## DETAILED ACTION

### *Allowable Subject Matter*

1. The following is an examiner's statement of reasons for allowance:

Claim 21 is allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts. Prior art fails to teach:

arranging said input member to receive a control signal from at least one control arrangement connected to said input contact of said input member, upon reception of said control signal generating an action signal comprising an address corresponding to a unique identity of said output contact connected to at least one of the controllable devices, and providing said action signal on said common bus by said input member to be received by said output member connected to at least one of said controllable devices.

Claim 22 is allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts. Prior art fails to teach:

Wherein said input member is arranged to generate an action signal transmitted over said bus from said input member to said output member, said action signal comprising an address corresponding to said unique identity of an output contact;

Wherein said output member is arranged to monitor said common bus, and upon reception of a signal corresponding to a unique identity of one of its output terminals output a signal to said terminal.

Dependent claims 2 – 20 are rendered allowable, as their respective independent claim 22 is allowable.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
